

List of the Courses taught in English at the Faculty of Mechanical and Process Engineering of Hochschule Düsseldorf - University of Applied Sciences

Remarks:								
1) Although the compulsory courses are usually offered only in one of the two semesters of the year the exams for the compulsory courses can be taken at the end of both semesters. Thus, it is possible to take the exams of those courses, even they are not offered in the respective semester.								
2) In the study plans and course descriptions, some courses are listed only by the German title, although they are also taught in English. For such courses, the English title in square brackets provided in the list below is just a translation, but not the "official" title. In order to find the corresponding course description in the module guide, please use the German title and/or the code.								
3) The definitive list of elective classes will be offered only a couple of weeks prior to the start of classes in each term. Please make sure to check the website.								
4) Note that the "Master Courses" are only available to graduate students, who already hold a Bachelor's degree and are enrolled in a Master's programme or higher at their home university.
